

FROG'S LEAP

LEAN AND GREEN

DID YOU KNOW?

Fewer than 2% of all grapes grown in California are certified organic?

At Frog's Leap, we are not only *ORGANIC* growers, but we *DRY FARM* and our winery is *SOLAR* powered! This means better health for our employees and our vines, which equals better quality in the bottle.

All our wines are lower in alcohol with an uplifting acidity and true fruit character.
